1 RESEARCH ON UNEMPLOYMENT

1.1 Defining unemployment

Unemployment is the state of being unemployed . OR It can be defined as is a phenomenon that occurs when a person who is actively searching for employment is unable to find work.

Though with regard to economics, The unemployment rate is a measure of the prevalence of unemployment and it is calculated as a percentage by dividing the number of unemployed individuals by all individuals currently in the labor force.

1.2 Why research on unemployment

This is to help all the bothered government bodies to clearly make resolution on how to reduce on unemployment using the collected data.

1.3 Methods of data collection

Interviews, questionnaires and surveys were used to get the information for tabulation.

2 UNEMPLOYMENT FORM

Name	DistrictName	Eductionstatus	Employed
